Our regular tanks approved by
I.S.I., M.E.S., P.M.C., B.M.C.,
B.E.S.T., RAILWAY, D.G.S.&D.
& many more

LIGHT WEIGHT :

aashhish Tanks are produced out of best quality polyethylene and are very light in weight compared to M. S. tanks; Ferocrete and R. C. C. tanks, thus very easy for transportation and installation without fear to breakage

EASY CLEANING :

The outer and inner surface, edges & corners of *aashhish* tanks are smooth, rounded & nonporous as a result they do not harbour bacteria. They can be easily cleaned with steam or hot water

PHYSIOLOGICALLY HARMLESS :

aashhish Tanks do not affect foodstuffs or beverages nor have any smell. They fulfill the requirements laid down by the Food & Drug Administration.

NO MAINTENANCE COST :

M.S. Tanks rust and R.C.C. & Ferocrete tanks leak leading to a higher maintenance cost and consequent replacement. *aashhish* Tanks are produced from Polyethylene so they do not rust. Furthermore they are moulded in one piece without joints so they do not leak. Hence no maintenance cost.

HEAT AND COLD RESISTANCE :

aashhish Tanks withstand temperatures both at boiling and freezing points. They have excellent resistance to all temperature changes.

CHEMICAL RESISTANCE :

aashhish Tanks are resistant to acids and alkalies and remain unaffected by synthetic detergents. They do not deteriorate even in polluted area.

RECTANGULAR LOFT TANKS
